Dear Donor,

My name is Joan Naneu. I live in Kajiado, 100km from Nairobi where I am schooling. The environment is quite unpleasant this is because all the trees have been destroyed so the place is turning a desert with very hot days and a scorching sun while very cold in the night. This has been a big problem to me because I have allergies in the cold climate.

I am in a family of many people. My mum divorced leaving me with my father who in turn married two other wives who I stay with them now. It has been a problem to cope with them but I have no other alternative. My mum is now married to ~~one~~ another man and she has four children. My three brothers and one sister. This gives me to use this opportunity and become the best of myself to help my community.

I would like to become a lawyer in future because I want to see everyone judge fairly with justice. I would like also to join a good campus after high school.

I like dancing reggae and playing games in the computer. My favorite subjects is Maths, Physics, History and Geography.

I like playing different games but my favorite sports are badminton, volleyball and tennis (long tennis).

I enjoy taking ugali and meat with a glass of juice especially at super time.

My favorite teacher is Mr Ondieki our maths teacher because he teaches Maths very well and makes a lot of fun in class which makes me enjoy and always long for his lesson. After all Maths is my best subject thus I love the teacher.

In school I like going for junkies, dancing during entertainment and of course learning of new things day and day out.
